PROFESSIONAL SUMMARY

Associate Functional Consultant with hands-on experience in ERP consulting, Odoo implementation, functional support, and business process analysis. Skilled in gathering requirements, translating business needs into ERP solutions, troubleshooting functional issues, and optimizing workflows. Strong knowledge of Odoo Sales, Purchase, Inventory, and Accounting processes, with a foundation in Information Systems and Financial Management. Experienced in client coordination and working with technical teams to deliver practical ERP solutions.

WORK EXPERIENCE

NeroSoft Solutions (Pvt.) Ltd - Sri Lanka Associate Functional Consultant Promoted from ERP Trainee Consultant Duties and Responsibilities - Analyzed and translated client business requirements into practical, scalable ERP functional solutions, ensuring alignment between business needs and system capabilities. - Studied and documented existing business processes across departments, identifying gaps, inefficiencies, and areas for improvement, and recommended process enhancements to optimize workflows. - Delivered functional support and troubleshooting for Odoo ERP modules, resolving configuration and workflow issues to minimize business disruption. - Collaborated closely with clients, end users, and technical/development teams to clarify requirements, bridge communication gaps, and ensure smooth, successful ERP implementation. - Configured, tested, and validated ERP functionalities to ensure they met agreed business requirements before deployment. - Document existing business processes, identify operational gaps, and recommend ERP-based process improvements to strengthen overall data integrity. - Conducted functional testing and supported User Acceptance Testing (UAT), coordinating with stakeholders to confirm system readiness for go-live. - Supported ERP data migration activities, including data imports, validation, and cleansing, to ensure data accuracy and integrity. - Provided hands-on user training and guidance, resolving day-to-day functional issues to improve user adoption and system efficiency. - Actively participated in Agile development cycles and ERP implementation projects, contributing to sprint planning, reviews, and iterative delivery.	March 2026 – Present
Trainee Odoo Functional Consultant Duties and Responsibilities - Gained hands-on experience in end-to-end Odoo ERP implementation and functional consulting, building strong expertise across core business modules and workflow automation. - Assisted senior consultants in analyzing client requirements and evaluating existing business processes to map out practical ERP solutions and identify operational gaps. - Supported system configuration, data import validation, functional testing, and troubleshooting to ensure custom ERP features met specific business needs. - Collaborated closely with functional and technical teams to investigate complex system issues, perform root-cause analysis, and coordinate development fixes. - Provided ongoing user support and operational assistance, demonstrating high performance that led to a promotion to Associate Functional Consultant.	August 2025 – March 2026

Duties and Responsibilities

- Managed Accounts Receivable as the primary responsibility, including invoicing, payment allocation, customer account management, and reconciliation
- Utilized Odoo Accounting to manage financial transactions and customer accounts, gaining practical exposure to Sales and Purchase module integrations.
- Maintained accurate records and ensured alignment between ERP data, operational activities, and supporting financial data by identifying and reconciling discrepancies.
- Created basic Power BI dashboards and visualizations to support financial reporting and improve data visibility.
- Collaborated with finance and system teams to optimize ERP-based workflows, document processes, and ensure data integrity.

PROJECTS AND RESEARCH

- Mobile Sales Application with AI Chatbot
 - Developed a Flutter-based mobile sales application integrated with Odoo ERP for accessing customers, products, inventory, and creating sales orders.
 - Integrated Odoo APIs (XML-RPC/JSON-RPC) to enable real-time ERP data access and transaction processing.
 - Developed an AI-powered chatbot using Laravel/PHP and OpenRouter API to provide natural-language business insights from Odoo data.
 - Implemented modules and features covering Sales, Inventory, Customers, and Sales Order Management.
 - Designed the solution to improve sales team accessibility, ERP data analysis, and decision-making.
- Market Research on Smart Purification Portable Water Bottles in Sri Lanka
 - Conducted market research about water bottles in Sri Lankan market to understand the market conditions, customer preferences, competition and potential opportunities for our new product and created a business plan for it.
- Web Based Patient Appointment Scheduling System
 - Analyzed organizational challenges and gathered requirements through stakeholder interviews.
 - Proposed and documented solutions, including a web-based appointment scheduling system for improved efficiency and user experience.
 - Collaborated with cross-functional teams during Agile sprints, ensuring alignment with business needs, reducing administrative workload, and enhancing customer satisfaction.
- Data Analysis with PowerBI
 - Analyzed Sri Lanka's rice production data, exploring its correlations with GDP, inflation, and arable land.
 - Designed a dimensional model, managed data in MySQL, and created a Power BI dashboard.
- Data-Driven Financial Analysis Using ERP Systems - Frella International Pvt Ltd
 - Analyzed financial data extracted from Odoo ERP using Power BI to generate automated dashboards for finance teams.
 - Applied knowledge from Odoo Functional Training to structure data queries, improve reconciliation accuracy and present insights to management.
 - Supported ERP reporting accuracy by integrating learnings from ERP Next training on data flow and financial modules.
- CAB Motors Online Service Hub - Final Year Project
 - Gathered and analyzed stakeholder requirements through interviews and focus groups to define business needs and project scope.
 - Created user stories, documented functional requirements and modeled workflows using Agile methodology.
 - Collaborated with developers to ensure the final system aligned with user needs, improving customer accessibility and service efficiency.
